

Bernard Edet Ekoli

Full-Stack Developer, AI Engineer & Founder

bernardedetekoli@gmail.com | +234 703 257 1478 | ekolix.com.ng | [LinkedIn](#) | [GitHub](#)

PROFILE

Problem-driven full-stack developer with 3+ years of experience building production-ready web applications. I don't build for the sake of building, I find real problems and ship solutions that work. Founder of Ekmark, a free SaaS image watermarking tool, live now with real users. Currently building EkolisPay, a fintech BaaS platform for freelancers, including an AI assistant. Comfortable across the full stack from pixel-perfect UIs to REST APIs, AI integration, and cloud infrastructure.

SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3
Backend	Node.js, Express.js, NestJS, REST APIs, Firebase Admin SDK, Zod, IP Rate Limiting
Database	MongoDB, Firebase Firestore, PostgreSQL
AI Engineering	LLM APIs (OpenAI, Anthropic), LangChain, RAG Pipelines, Prompt Engineering, Vector Databases
DevOps & Tools	Git, GitHub, Vercel, Render, Docker, VS Code
Expanding Into	Python, FastAPI, AWS, React Native

PROJECTS

Ekmark, Free Image Watermarking SaaS

ekmark.ekolix.com.ng | [GitHub](#) | [Live, serving real users](#)

- Built a full-stack SaaS tool for watermarking up to 10 images at once, fully free, no sign-up required.
- Engineered a Node.js/Express backend with Firebase Firestore, Zod validation, and IP-based rate limiting.
- Built a public API that lets other developers integrate watermarking directly into their own platforms.
- Deployed frontend on Vercel and backend on Render; full SEO setup with sitemap, robots.txt, and Open Graph tags.

Stack: Next.js, TypeScript, Tailwind CSS, Node.js, Express, Firebase Firestore

EkolisPay, Fintech BaaS Platform (In Progress)

[Personal project, actively building](#)

- Building a fintech platform helping freelancers hold and manage Naira alongside USD, EUR, and GBP balances.
- Integrating Paystack for Naira holdings and Finra for multi-currency USD, EUR, and GBP accounts.
- Developing EkTan, an AI-powered assistant, applying LLM integration and prompt design in a real product.

Stack: Next.js, TypeScript, Node.js, Express, PostgreSQL, LLM APIs

TheNigerianProperties, Property Listing Platform

thenigerianproperties.com | [GitHub](#) | [Client Project](#)

- Built a full-featured real estate platform with property listings, search, and advanced filtering.
- Developed an admin panel for property management and an agent dashboard for handling client enquiries.
- Implemented an in-site enquiry system that routes interested buyers' contact details directly to agents.

Stack: Next.js, React.js, Node.js, Express, MongoDB

EXPERIENCE

Ekmark

2025, Present

Founder & Full-Stack Developer

- Designed, built, and deployed a full-stack SaaS product end-to-end as a solo founder.
- Handled all product decisions, architecture, UI/UX, backend, deployment, SEO, legal, and pre-launch marketing.

Freelance Full-Stack Developer

2022, Present

Self-employed, Remote

- Delivered a production real estate platform (TheNigerianProperties) for a client, including admin panel, agent dashboard, and enquiry system.
- Provided ongoing web development services to local businesses across real estate, legal, and service industries.

EDUCATION

Self-Taught Full-Stack Developer

2022, Present

Independent Study, Online Resources, Documentation & Real-World Projects

- Mastered full-stack web development through intensive self-study, building and shipping production-grade applications from scratch.
- Completed a dedicated AI Engineering course covering LLM APIs, RAG pipelines, prompt engineering, and vector databases.

Open to remote full-time, contract, and freelance roles worldwide.
